

# GRAU DataSpace

Securely store, share and access data from anywhere at anytime

## Secure Business Communication Platform Cloud Services Software

*All organizations, regardless of size, are being challenged with maintaining ownership and control of their data. Demands for both BYOD programs and convenient ubiquitous Internet access to business data are driving organizations to radically rethink their data management and security policies.*

*GRAU DataSpace is an innovative private cloud solution for secure file exchange for medium to enterprise sized organizations.*

### GRAU DataSpace Overview

GRAU DataSpace offers organizations a private cloud based communication platform for securely sharing and storing data over the Internet. Designed to replace FTP, email attachments and proprietary isolated applications, GRAU DataSpace securely transfers, stores and synchronizes files with various desktop clients and mobile devices.

GRAU DataSpace software is highly configurable for a single organization as a private cloud service. Each DataSpace user can have one or more Data Rooms which contain folders and files, optionally with individually configurable user permissions. Data Rooms can be shared amongst DataSpace users and groups.

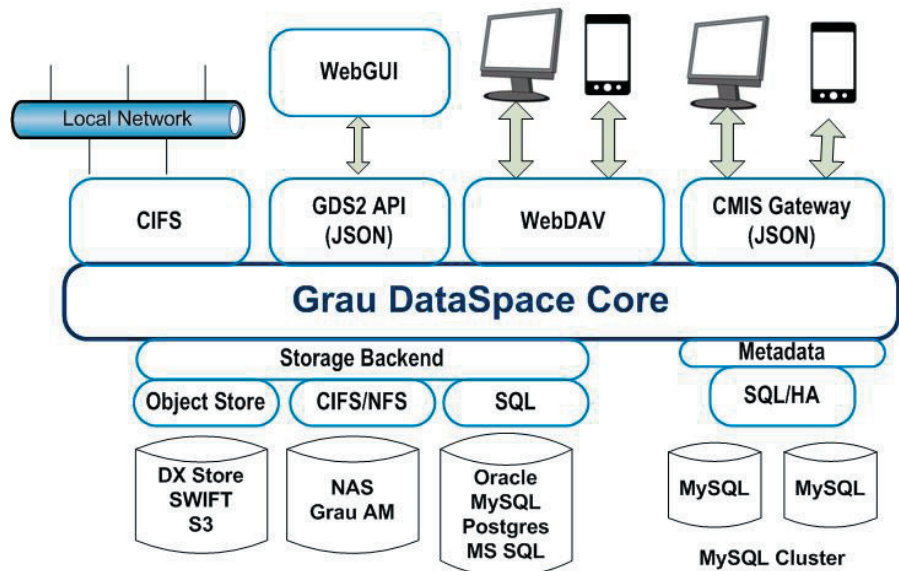

GRAU DataSpace users can access files/folders via a number of platform independent supported interfaces/APIs and software applications, including web browsers, drive letter mappings, desktop/mobile applications, and CMIS, "Content Management Interoperability Services".

GRAU DataSpace software is available for Linux and Windows servers, or packaged as a virtual appliance. Software licenses are prepaid annual licenses based on the total number of users.

### GRAU DataSpace Customer Scenarios

Typically, customers deploy GRAU DataSpace to:

- Provide encrypted/secured file sharing (internal or external);
- Reduce the burden on email systems (i.e., large attachments);
- Replace FTP and proprietary file sharing applications;
- Eliminate security holes in file sharing processes;
- Provide a secure cloud solution for business-essential data;
- Provide secure mobile access to business data;
- Synchronization of files on different devices.

### GRAU DataSpace Features:

- Secure SSL encrypted file transfers and encrypted file storage.
- Platform independent access via open industry standard interfaces: WebGUI, WebDAV, CMIS (OASIS standard) & mobile apps (iOS, Android, Blackberry & Windows).
- Multi-level hierarchy with a data space consisting of Data Room(s) & folder(s).
- IT compliance: audit logging of all activities; version control; & IDM's (AD, LDAP, SAML & OAUTH2).
- Compliant with German/EU data-protection & data-security regulations.
- File sharing as publicly accessible download/upload links (password protection is optional).
- Settable expiration date for download/upload links.
- File version management and full-text searching.
- Licensed on an annual prepaid fee per user, regardless of the amount of storage.
- Highly scalable, from 100 to 100,000's of users.
- Supports large file sizes (limited by the host OS).
- Optional, distributed multi-site DataSpace configuration available.
- Flexible storage backends: SQL databases; object stores; & NAS.
- Installable on Linux & Windows server platforms, or packaged as a virtual appliance.
- Brandable (optional).
- Multi-language support.

## GRAU DATA

GRAU DATA AG offers unsurpassed Windows and Linux based archive software solutions, which reduce risk, optimize performance and minimize compliance issues for users at 100's of organizations worldwide. Based on its in-depth understanding of archiving, GRAU DATA AG developed its ArchiveManager, OpenArchive, XtreamStore, FileLock and DataSpace software to help organizations comply with industry regulations while utilizing open systems hardware solutions. The company supports organizations in government, manufacturing, finance, education and healthcare industries. Established in 1999, GRAU DATA AG is a privately held company with headquarters in Schwabisch Gmund, Germany.

## Storage Clarity archive & compliance experts

Storage Clarity specializes in digital archiving, compliance, cloud and data-protection storage solutions, software and related services. The company's goal is building lasting partner and customer relationships to deliver innovative, reliable, and cost effective solutions. Established in 2009, Storage Clarity is a privately held company with headquarters in Calgary, Alberta, Canada.
